Welcome to the Lux Family

Purchasing a Lux product isn't just another purchase, it's a purchase backed by a company that aims to provide New Zealanders with a quality Bright home for Life. By purchasing a Lux you join the Lux Family. From humble beginnings manufacturing gas lamps in Sweden in 1901, Lux has become a world leader in quality household appliances.

Our interest is not just in the families of today but in the families of future generations. We aim to ensure they are able to lead a happy life in a clean environment. This is why, ever since 1992, environmental protection has been firmly Entrenched as one of the corporate goals and guiding principles of the Lux Group. Both the products themselves and the way they are manufactured adhere to the underlying principles of this environmental policy. Helping New Zealander provide their family, friends and businesses with a bright, hygienic and healthy home or workplace is another goal of Lux.

Here at Lux we Support the most important job in the world. It is hard to believe that one of the most important jobs in the world earns so little recognition. Yet the mothers and fathers who manage a family often perform real juggling acts. Lux New Zealand has a real commitment to families and our business partners operate in both part time and full time capacities which allow them not only to provide income to support their families but offers flexible working hours allowing them to spend the time they really want on family activities.

Lux New Zealand offer strong Quality Assured Warranties to stand behind the high quality products they supply, these warranties vary between machines, but are supported by a nationwide network of specifically selected quality Service agents to ensure you are able to get the support you need, when you need it. All our products are tried and tested so you can be sure that when you buy Lux you buy quality.

The Lux philosophy is for all families to have a bright and healthy home. "A healthy home is a happy home" and here at Lux we don't believe it should be difficult to achieve. This is why our products have the most advanced technology in filtering, performance and low energy consumption in the world. These factors mean that as a end result you save on costs, and have increased efficiency, giving you the time you need to focus on what really counts, and spend more quality time doing the things you enjoy most in life.

Dry Steam Explained...

What is Dry Steam?

Dry Steam is the new Cost Effective way to keep your home and business, healthy, hygienic, and sparkling Clean.

When heated to 100 degrees, Water turns into steam. However at this temperature, the water still has a very high moisture content and is still not hot enough to eliminate bugs, viruses, bacteria and other nasty's that live and breed in our homes.

Dry Steam is superheated and Pressurised to temperatures between 140 & 180 degrees. The result is a vapour with a humidity level around a low 5% referred to as Dry Steam.

The combination of Steam and pressure means that the microscopic cracks and Pores of all surfaces are able to be easily reached. The remaining dirt, grime and chemical residue that are easily missed by alternative cleaning methods are able to be removed with ease using Dry Steam. With the surface cleaned back to its natural state without any chemical residue the build-up of new dirt and grime is dramatically reduced, leaving you with a cleaner, healthier and more hygienic home or workplace.

Dry Steam works by using only minimal amounts of tap water, making it not only a very cost effective way of cleaning, but an environmentally friendly one too. Some of the other benefits of using Dry Steam are its ability to effectively kill dust mites reducing allergies. Dry Steam promotes sustainability while reducing and in most cases eliminating the need to use chemicals.

Dry Steam is an effective way to reduce chemicals, save the environment and provide a clean healthy home in one easy step.

Complete Packages

Lux NZ is able to provide you with all your cleaning needs. Not only do we have a range of high quality Dry steam Steamers available but we have a range of top-of-the-line vacuums available too. This means that we are able to help you provide a complete solution to keeping your home or business, healthy, hygienic and clean with minimum effort.

Providing a a clean, healthy and hygenic workplace has never been this easy, coming complete with accessories for jobs both big and small, you will wonder how you ever managed without it!

What's right for you?

Accessories

Accessories can make the world of difference when it comes to cleaning your home. Lux has ensured that all the necessities have been included with our range of steamers, and for those of you who will demand that bit more functionality out of your steam cleaner, we have a range of optional accessories available to suit almost every need. Whatever you need we have the right tools for you.

Most attachments come with longer extended nozzles, meaning you can keep your hands away from the area you are trying to clean. The high temperature achieved by the dry steam is enough to ensure that all bugs and bacteria are killed. These high temperature mean even when you use the attachment with a cloth, the dirt and grime is not only removed, but it is not transferred from one surface to another throughout the home,

Clean surfaces with ease, clean them once, and know they have been cleaned properly. Give yourself peace of mind that your environment is safe, clean and sterile by cleaning with dry steam.

The range of steamers offered by Lux NZ all come with a Standard accessory kit including; Diamond Brush tool, Floor Mop/Scrubber tool, Crevice attachment, 250mm Aluminium Steam Lance, Large Triangle Nylon brush, Detail Steel brush, Detail Brass brush, 2 x Aluminium extension poles.

With accessories ranging from small brushes for getting into those hard-to-reach places in both the kitchen and bathroom to larger floor and wall fittings to ensure that your home or business not only looks its best, but is providing a safe, clean and sterile environment for you and everyone in it.

The major advantage of the touch free chemical free cleaning provided by the range of accessories that accompany the Dry Steam Steamer range is that there is no residue left on surfaces. The residues other methods of cleaning leave behind leave places for bacteria and other nasties to grow.

Choosing the right Steamer for you

The Lux Dry Steam Steamer range offers something for everyone, from light residential works, to commercial, we have something that will be right for you. All Lux machines are of a high quality and offer outstanding performance. Choosing the machine that best suits your needs will ensure that all your expectations are met.

Here at Lux we understand that not everyone is an expert on the technical specification and details, and sometimes you just know what you need done. If this is the case, then don't hesitate to make contact with us to talk it over, we're more than willing to help find the machine with the right functionality and fit for your home and business. We can even offer you a free, no obligation in home demonstration so you can be sure that your needs will be met.
